

Splunk- Create Dashboard

Sunday, September 6, 2026 11:31 PM

Copied the command sourcetype="cisco_syslog" ("%LINK-5-CHANGED" OR "%LINEPROTO-5-UPDOWN")

Clicked Save As> Create a New Dashboard

Name: Cisco Network Monitoring

Dashboard type: Dashboard Studio

The screenshot shows the 'Create a New Dashboard' configuration screen in Splunk. The 'Dashboard Title' is 'Cisco Network Monitoring' with the ID 'cisco_network_monitoring_'. The 'Description' is 'This dashboard is for displaying Interfaces status/conditions.'. The 'Permissions' are set to 'Private'. Under 'Dashboard type', 'Dashboard Studio' is selected. At the bottom, the 'Grid' layout mode is chosen over 'Absolute'. Buttons for 'Cancel' and 'Save to Dashboard' are visible.

Create a Dashboard to monitor Interface changes and HSRP states changes
